tones: "Sir, I trust I do not incom-mode you by sitting here?" - Detroit Austin D. Hicks,

GREAT COMMANDERS.

While, to make a great captain, all the mental and physical qualities must exist in the greatest possible strength, varieties of these in com-bination, to a greater or less degree, bination, to a greater or less degree, have been possessed by Gonerals of less or greater repute in the world's-history, and number and intensity of these qualities in the combination give the General his relative place in the list of great soldiers. Some Generals are only brilliant upon the battle-field, and some even only in particular phases of a battle, though they may J. H. Twyman, phases of a batile, though they may possess certain qualities of a great leader to an extent which amounts, in its way, to an exhibition of genius as great as any great captain has ever shown. The particular quality which made Napoleon seize the colors Female College and incite his troops to follow him, at the bridge of Arcola, is well worthy of attention as being, at times, a most important factor in a battle. Alexander and

Henry of Navarre were leaders whose personal power on the battle-field may be said to have directly influenced many of their victories. Many of Napoleon's licutenants had this in-New Barber Shop! Sapoteon stinct of leadership; Launes and Mas-seina to an eminent degree. Washing-ton showed it in the power of his personal presence to change a retreat into an attack, and Scott made a brilliant SHAVING, SHAMPOONING. lisplay of it at the battle of Landy's Lane. The civil war shows but little of this divine gift. General C. F. All done in the Latest Fashion and Satisfac-tion Guaranteed. Nothing but clean towells 1-11-87. Smith may be said to have had the genius of battle highly developed in him, as was conspicuously shown at the battle of Fort Donelson. It is not.

lways given to gonius to succeed in hese efforts. Napoleon failed at the bridge of Areda, though it is possible that the desperate fighting around his person on the causeway kept the enemy closely employed until another force had taken the town in the rear, and that, therefore, his act secured his great victory. — General "Baldy" Smith, in North American Review.

FLAMINGOES AT HOME.

The Brittiant Fluorage of the Most Beautiful of Tropical Birds.

A walk of about an hour brought us blood through the veins. We know to a small clump of trees, from behind how prolonged sitting may cause the which we carefully reconnectered, and there, within half a mile, we saw the give way or permit the extravasation has lit the fire three times with kerosene this week, and I don't think that dynamite will hurt her."—Wash- were three separate clusters of nests, the position of the legs of the sitting up by persons who lead somewhat birds there was nothing for it but a long trade." "Indeed? I don't know that." "Why, the name ought to tell you.—Gloveraville." "To be sure! And I suppose they make tights in Titusville."—N. Y. Mirror.

The first quarter of a mile was comparatively easy, as we could creep on paratively easy, as we could creep on stalk over the intervening stob, and with chief numoriced as that of leaning for-the blazing aun now almost vertical ward as at work at a table which is Titusville. —N. E. Mirror.

—He was determined to go out at the end of every act. Three acts had been played and three times had be scraped by and trodden on the feet of for real hard work. been played and three times and ac scraped by and trodden on the feet of his neighbors. At the end of the for real hard work let me recommend it to those who are content with very north act, as he want crashing through the narrow space, a lady in the aisle seat said in her most dulcet tones: "Sir, I trust I do not incompanies that our work form a cloudless sky; we now were, from a cloudless sky; would be saved.—London Lancet." but I suppose that our profuse per-spiration saved us from any ill effects the rapid evaporation counteracting the sun's heat. It may be that I was too anxious about reaching a favora-ble point of observation to think of it,

but I can not say that I even suffered covered the slob like a network of croquet hoops, we found ourselves at the edge of the mari and within 150 yards of the birds, who were still undisturbed. Here, with my glasses, I could see every feather, note the color of the eyes, and watch every movement. There were, we calculated, between seven handred and a thousand birds, and a continuous, low gooselike encking was kept up. Never did I see a more beautiful mass of color. The male birds had now all got to-I see a more beautiful mass of color. The male birds had now all got together, standing about five feet high,
and with neeks extended and heads
creet were evidently watching events,
preserving in the meantime a masteriy inactivity. Now and again one
